

## **Art Class and Folktales**

This class will focus on exploring the world of art, texture, line, shape, and colors as the children have the opportunity to create their own original artwork.

A wide range of basic media skills will be developed including painting, drawing, collage, sculpture and craft, all specific to Georgian styles. Simultaneously, the students will be exposed to famous Georgian architectural monuments and historical treasures that will expand their artistic horizons. Children will also be introduced to renowned Georgian artists' works that will serve as inspirations for their own artwork.

Students will enjoy working with pencils and/or paint and will be able to understand the concept of line, value, and perspective. The class will work with a variety of topics including still life, landscape, decorative, and abstract.

This class will also integrate Georgian stories and folktales. Students will learn the art of storytelling while at the same time discussing the values and morals that these stories evoke. Art projects expressing these Georgian traits will help provide a holistic approach to learning, inspiring and passing on tradition.
